EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Peter DeVore on 9/22/2008.
3. The application has been amended as follows:
 - ***The Abstract has been replaced as follows:***
 - A packaging and filling apparatus fills a tube of a web of a packaging material with a fluid product, forms lateral seal bands, cuts each seal band of a series of pillow-like preformed bodies with a cutting device to form a packaging and filling container of the final form. The cutting device comprises a resistance measuring device for measuring a cutting resistance pressure that a packaging material cutting blade receives from the packaging material, and then outputting a measurement value obtained, and a blade monitoring device for monitoring the condition of the packaging material cutting blade based upon based upon a comparison of a difference between a maximum measured cutting resistance pressure and a constant measured cutting resistance pressure following the maximum measured cutting resistance pressure with a predetermined pressure difference reference value. --
 - ***In the Specification:***
 - The phrase: --This is a 371 national stage of the PCT/JP04/10717 filed 07/28/2004.-- has been inserted below the title.
 - ***In Claim 1:***
 - pressure-- has been inserted between "resistance" and "that" on line 9.

- ***In Claim 5:***

--pressure-- has been inserted between “resistance” and “that” on line 9.

- ***Claim 7 has been amended as follows:***

7. (Currently Amended) A method of operating a packaging and filling apparatus comprising:

longitudinally sealing a web of packaging material to form a tube of packaging material;

filling the tube of packaging material with a fluid product;

forming spaced apart lateral seals in the tube of packaging material to produce a plurality of interconnected fluid-containing preformed bodies;

cutting the tube of packaging material at an intermediate region of the lateral seals with a cutting blade to separate the preformed bodies from each other and form individual fluid-containing containers;

measuring a cutting resistance pressure that the cutting blade receives from the packaging material; and

~~replacing the cutting blade based on the measured cutting resistance.~~

determining the condition of the cutting blade based upon a comparison of a difference between a maximum measured cutting resistance pressure and a constant measured cutting resistance pressure following the maximum measured cutting resistance pressure with a predetermined pressure difference reference value.

- ***Claim 8 has been cancelled.***

Reason for Allowance

4. The following is an examiner’s statement of reasons for allowance:

- With respect to claims 1 & 5, the prior art fails to disclose and/or teach a cutting device that comprises: a resistance measuring means for measuring a cutting resistance pressure that the cutting blade receives from the packaging material, and blade monitoring means that monitors the condition of the cutting blade based upon a comparison of a pressure difference between a measured maximum

resistance pressure and a constant resistance pressure following the maximum resistance pressure with a predetermined pressure difference reference value.

- With respect to claim 7, the prior art fails to disclose and/or teach a method of operating a packaging and filling apparatus that comprises, among other steps, the steps of: measuring a cutting resistance pressure that the cutting blade receives from the packaging material, and determining the condition of the cutting blade based upon a comparison of a pressure difference between a measured maximum resistance pressure and a constant resistance pressure following the maximum resistance pressure with a predetermined pressure difference reference value.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louis K. Huynh whose telephone number is 571-272-4462. The examiner can normally be reached on M-F from 8:00AM to 3:00PM.
